Freelance Machine Learning Engineer
Based in Paris, France – available remotely (on-site max 2 days / week)
Rates: €500 – €600 / day

Professional Summary

Senior Machine Learning Engineer specializing in MLOps and production-grade AI systems. Focused on helping startups and tech teams turn prototypes into scalable, maintainable, and secure ML products. Combines 30 years of experience in software engineering and consulting with hands-on expertise in AI, cloud, and automation.

Core Expertise

Production ML deployment • MLOps practices • Cloud infrastructure (GCP, AWS) • CI/CD for ML • Containerization (Docker, Kubernetes) • NLP & Deep Learning • FastAPI • MLflow • Data pipelines • Client consulting & delivery

Consulting & Recent Work

Freelance Data Science Consultant & Teacher (2017 – Present)
Delivered ML consulting projects and taught MLOps/AI at top French institutions (École Polytechnique, Sciences Po).

Recent Projects (2023 – 2024):
– **Molière Translation App:** Built and deployed React Native app with AI-powered translation, content generation pipeline, and GDPR-compliant infrastructure.
– Developed production-ready ML APIs for NLP and text analysis tasks (Python, FastAPI, Docker, MLflow).
– Supported startups in cloud infrastructure setup (GCP/AWS), ML model deployment, and CI/CD pipelines.
– Provided technical mentoring for ML engineers adopting MLOps best practices.

Teaching & Mentoring

Taught MLOps, Deep Learning, and AI Engineering at leading French institutions including École Polytechnique and Sciences Po. Courses covered Docker, CI/CD for ML, cloud deployment, and model serving.

Tech Stack

Python • FastAPI • Docker • GCP • AWS • MLflow • TensorFlow • PyTorch • Airflow • Streamlit • React Native • GitHub Actions

Education

PhD in Applied Mathematics – Université Paris VI (Sorbonne Université)
